Projects

Ariadne SAST Engine

Developed the SAST engine behind the Ariadne VSCode extension, a capstone project designed to detect code security vulnerabilities in real-time for secure coding habit reinforcement.

Groundhog File Snapshot Manager

Developed a file state management CLI tool for capturing directory states as point-in-time, full copy snapshots reproducible through fast merkle-diffing.

Dagger File Explorer

Developed a Rust-based file explorer using the Tauri framework, achieving milliseconds-fast file queries on large file trees through multi-threaded file walking and directory content caching.
